

My name is Martha McKeon Lynch. I am a student of Dublin Counselling and Therapy Centre, which is in partnership with the University of Northampton. I am currently undertaking a Master's in Adolescent Psychotherapy and I am conducting a piece of research titled:

**Therapists' experience of working with adolescents with ADHD diagnoses: An IPA**

The intended benefits from the research will be to use therapist expertise to develop understanding and practice in working with adolescents with ADHD.

I am looking for therapists who have at least 5-years' experience of working psychotherapeutically with adolescents (ages 11-24) with a diagnosis of ADHD to participate. It is not crucial that you are currently doing this work but that you have had a minimum of 5 executive years' experience in this area and that it has been in the last 2 years.

Participation in this study is voluntary and there will be no payment for participating.

If you fit this criterion and would be interested in participating in this anonymous piece of research which will involve a semi-structured interview, please contact me. (email: [marthapsychotherapy@outlook.com](mailto:marthapsychotherapy@outlook.com) phone: 089-2192133)
